DCH-RP Digital Cultural Heritage Roadmap for Preservation is a coordination action supported by EC FP7 e-Infrastructures Programme, launched to look at best practice for preservation standards in use.

The project aim to harmonize data storage and preservation policies in the digital cultural heritage sector; to progress a dialogue and integration among institutions, e-infrastructures, research and private organisations; to identify models for the governance, maintenance and sustainability of the integrated infrastructure for digital preservation of cultural content.

It involves 13 partners from EU countries and will move to external partners from Europe and other countries.

## Work packages

DCH-RP project is composed of 5 work packages:

### WP1 - Project Management

**WP Leader - Istituto Centrale per il Catalogo Unico delle biblioteche italiane e per le informazioni bibliografiche (ICCU)**

Objectives:

- To coordinate the activities of the project
- To ensure timely and high quality deliverables
- To stimulate and encourage all work-packages
- To monitor and facilitate progress
- To identify and overcome obstacles and issues before they delay or disrupt the project
- To liaise as necessary with the Commission
- To establish a coherent management framework able to ensure a continuity of operations, beyond the present DCH-RP project life-time, with the final aim to pave the way towards the implementation phase when the DCH-RP Roadmap will be put in place.

The Work package consist of 3 Tasks:

- Task 1.1 Project kick-off (Task Leader: ICCU)
- Task 1.2 Project reporting (Task leader: ICCU)
- Task 1.3 Assessment of progress and results (Task Leader: Promoter)

### WP2 — Dissemination and sustainability

**WP Leader - Istituto Centrale per il Catalogo Unico delle biblioteche italiane e per le informazioni bibliografiche (ICCU)**

WP2 will be build on the feedback received at the kick-off meeting and all the following information seminars and workshops organised by the project. WP2 will also disseminate the results achieved by the Proof of Concept run in WPs.

# EU RELATED PROJECTS

A list of European projects related to DCH-RP

Home • EU RELATED PROJECTS

## EU related projects

**CHAIN**

The CHAIN project aims to coordinate and leverage the efforts made over the past 6 years to extend the European e-Infrastructure (and particularly Grid) operational and organisational principles to a number of regions in the world. CHAIN uses their results with a vision of a harmonised and optimised interaction model for e-Infrastructure and specifically Grid interfaces between Europe and the rest of the world. The project will elaborate a strategy and define the instruments in order to ensure coordination and interoperability of the European Grid Infrastructure with those emerging in other regions of the world (Asia, Mediterranean, Latin America and Sub-Saharan Africa).

**CHARISMA**

Cultural Heritage Advanced Research Infrastructures: Synergy for a Multidisciplinary Approach to Conservation/Restoration

**D4SCIENCE**

D4Science (Data Infrastructures Ecosystem for Science) is a production e-Infrastructure able to support several heterogeneous virtual organizations. D4Science-II is an European e-Infrastructure project, co-funded by the European Commission's Seventh Framework Programme for Research and Technological Development. It constitutes a continuation of the DIUGRID and D4Science projects.

**DL.ORG**

Interoperability is key to advancing Digital Libraries, broadening choice and opening up new research perspectives across diverse domains. DL.org has investigated the complexities of interoperability from multiple perspectives. The DL.org [Cookbook](#) provides a framework for addressing interoperability coupled with patterns and solutions. The DL.org [Digital Library Reference Model](#) provides a roadmap enabling the diverse stakeholders involved to share a common understanding and follow the same route when dealing with the multi-faceted Digital Library universe with tailored publications for Library professionals, educationalists, students and assessors:

**ERIKM**

The ERIK project aims to "connect", through the adoption and use of Grid training Infrastructures, along with that of e-Infrastructures, research & development and innovation with education in order to increase the number of users and scientific applications of these platforms.

**EU/MEDGRID-Support**

Home » JOIN OUR COMMUNITY

## Join our community

- Are you a cultural institution engaged in digital preservation activities?
- Are you an Academic and Research Institution, a public or private publisher active in digital preservation?
- Are you an e-Infrastructure provider or an e-Infrastructures Research Organization?
- Are you a programme owner, SME, company of creative Industry, R&D Institution?
- Are you interested in digital presentation activities and in being part of the DCH-RP network?

DCH-RP is open to collaborate with experts, institutions, e-Infrastructure, and in liaison with other projects who are interested to establish a close cooperation in order to achieve the respective objectives.

Contact us at: [info@dch-rp.eu](mailto:info@dch-rp.eu) illustrating your competences and interests. You will receive an invitation to sign a Cooperation Agreement from the projects coordinator.

If you cooperate in the DCH-RP project you have the right to:

- Participate in the DCH-RP National Working Group, if existing, in your country.
- Participate to the debate of the Working groups and be in the DCH-RP mailing list.
- Be invited to conferences, international workshops and technical meetings organized by DCH-RP.
- Have access to the DCH-RP deliverables, technical reports and other materials produced by the project in the frame of the scope of the DCH-RP Initiative.
- Participate in dissemination and training activities.
- Participate in the execution of the Proof of Concepts to implement and validate the concepts established in the Preservation Roadmap for Preservation.

Choose the form of cooperation which best fits your interests!

Which are the benefits?

- Be part of a Digital Cultural Heritage network of common interest towards a preservation Infrastructure for DCH.
- Be part of an international community related to digital preservation in the DCH sector and e-Infrastructures based research in the digital preservation field.
- Be in liaison with international organizations and federation of Infrastructures.
- Be stimulated in the use of e-Infrastructures for addressing the service of long-term digital preservation.
- Be invited to conferences and international workshops organized by DCH-RP.
- Have access to the DCH-RP deliverables, technical reports and other materials produced by the project in the frame of the scope of the Linked Heritage Initiative.
- Be stimulated in the use of e-Infrastructures by the DCH community, addressing the key service of long-term digital preservation.
- Participate in dissemination and training activities.
- Start to work towards an Open Science Infrastructure for Digital Cultural Heritage in 2020.

Download the Cooperation Agreement ([PDF](#), 194 kb).

Two copies of the Agreement should be sent to the project coordinator, with the data and signatures of the cooperating institution.

After the coordinator's signature, one copy will be sent back to the new cooperating institution.

For any further information, please contact the project coordinator at: <http://info@dch-rp.eu>

# The services: ADD THIS

AddThis is the add-on tool to make sharing and bookmarking simple, and to have all one's favourite web 2.0 social networking, bookmarking, blogging and e-mail services at one's fingertips. The tool is available in each page of the website

# The services:STATISTICS

A statistic analyser has been activated. The statistics are implemented with Advanced Web Statistics 6.9 - created by AWStats

This is a free real-time log file analyzer to get advanced statistics, licensed under GNU GPL

Statistic are managed by the webmaster who will periodically provide statistics report

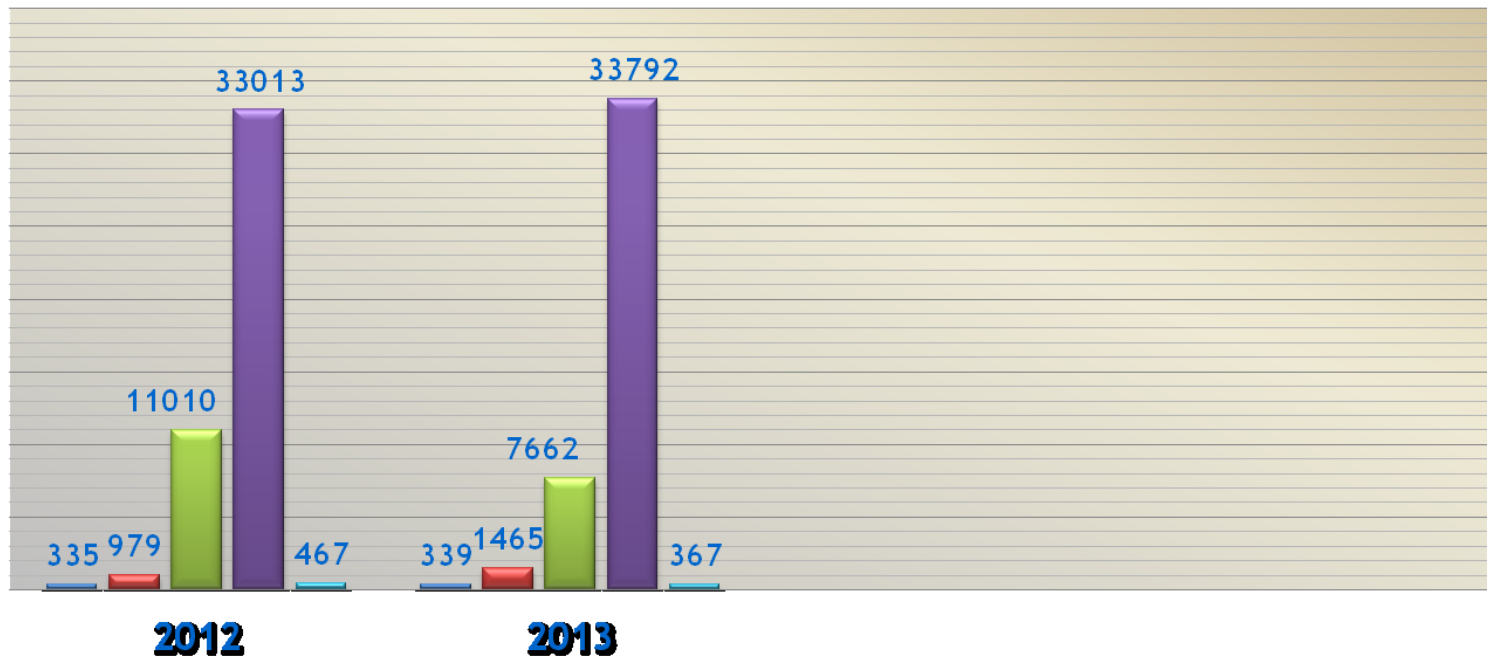

# The services:STATISTICS

## Statistics about project website online from 2012-10-15

■ unique visitors ■ number of visits ■ pages ■ Hits ■ Average time spents

# The mailing lists

[info@dch-rp.eu](mailto:info@dch-rp.eu)

Devoted to all stakeholders interested in DCH-RP project

[partners@dch-rp.eu](mailto:partners@dch-rp.eu)

Devoted only to partners

[ecsgadmin@dch-rp.eu](mailto:ecsgadmin@dch-rp.eu)

Reserved to the administrators of the e-Culture Science Gateway will be created in the context of WP5

# Future Development

- Constantly update the website
- Timely publish news and events
- Make Deliverable and other documentation timely available
- Create/update new sections when required

Digital Cultural Heritage Roadmap for Preservation - RI

Framework Programme 7 (2007-2013) Research infrastructures projects

## DCH-RP

### Summary

Digital Cultural Heritage (DCH) is producing a large amount of digital content that need to be safely stored, permanently accessed and easily re-used by the humanities researchers. The vision for the next two decades is to implement a federated infrastructure dedicated to support the application of open science in the arts and the humanities. Preservation is the first priority. National digitization programmes in Europe and internationally address the issue of the preservation in a separate manner, while a shared implementation of common e-infrastructure layers could be beneficial and cost effective.

DCH-RP is a coordination action to develop and validate a Roadmap for the implementation preservation federated e-infrastructure for DCH. Such infrastructure will exploit the facilities offered by the research infrastructures, namely by NREN, Grid Initiatives and the newer data infrastructures. It builds upon the knowledge generated in the past.

DCH-RP does not deal with digitisation and will not per se which is instead a matter for national and regional programmes. Roadmap to be executed within future implementation phases. Roadmap will harmonise data preservation policies in the DCH sector and to progress with the dialogue among DCH institutions, e-organisations; governance, maintenance and sustainability.

### Objectives

The main objective to be achieved by DCH-RP is to design and implement an e-Infrastructure for preservation of digital cultural heritage. The infrastructure will support the existing infrastructures: national infrastructures (NRENs), research infrastructures (e.g. DARIAH, CLARIN, DASH), commercial sector (e.g. commercially available services), and the underlying service architecture, the interoperability as well as the access, governance and maintenance. Among others, the digitalmaeculture.net platform will be used. Six proof of concept will be organised where cultural institutions will experiment the actual use of grid and clouds to store based on the use of the e-Culture Science Gateway (eCSG) produced by the INDICATE project.

Sustainability of the infrastructure will be planned by an other similar initiatives in order to derive concrete solutions to be applied. This will also be pursued also by cooperation with the private sector, especially the publishers.

### Action plan

The project consists of five work-packages:

- WP1 µ Project Management
- WP2 µ Dissemination and sustainability
- WP3 µ Preservation Roadmap
- WP4 µ Case Studies and Best Practice
- WP5 µ Proofs of concept

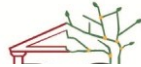

### Coordination activities

The first benefit of DCH-RP coordination activity deals with reinforcing the dialogue between the arts and humanities sector and the ICT infrastructure (e-Infrastructure) providers.

DCH-RP

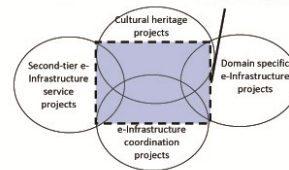

Project acronym: DCH-RP

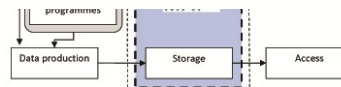

## DIGITAL CULTURAL HERITAGE ROADMAP FOR PRESERVATION

## DIGITAL CULTURAL HERITAGE ROADMAP FOR PRESERVATION

### Five integrated Work Packages:

- WP1 – Project Management
- WP2 – Dissemination and sustainability
- WP3 – Preservation Roadmap
- WP4 – Case Studies and Best Practice
- WP5 – Proofs of concept
