

STAGED ROLLOUT REPORT

The Early Adopter team should fill the “grey” areas

NGI	NGI_UK				
Site Name	UKI-LT2-IC-HEP				
EA team names	Daniela Bauer				
EA team contacts	daniela.bauer.grid@googlemail.com				
Product	EMI CREAM/SGE SL6	Version	1.14.3	RT ticket ID	5008

The “*outcome*” is one of: **OK**, **WARN**, **FAIL**, **NA** (Not Aplicable), **Nver** (Not verified/Not tested).

Copy/paste any results from your commands where you see fit.

Metric	<OK WARN FAIL NA NVer>	WEB URLs, Command used, other comments (please always fill this table with as much information as possible, and as you see fit)
Release notes and other documentation	OK	
Installation or upgrading (<i>specify which</i>)	WARN	New install. post install script on glite-ce-cream sets too restrictive permissions on the cream sandbox. When sharing a sandbox partition between several CEs, then reinstalling one will break the others. rpm -q glite-ce-cream-1.14.3-1.sl6.noarch --scripts grep sandbox mkdir -p /var/cream_sandbox chown tomcat:tomcat /var/cream_sandbox chmod 700 /var/cream_sandbox https://ggus.eu/tech/ticket_show.php?ticket=91688
(RE-)configuration (<i>if using yaim, specify command used</i>)	WARN	The first time I run yaim it fails with the error /etc/lrms/scheduler.conf does not exist (I am pretty sure I complained about this one before as well, it's SGE specific as far as I remember). Running yaim for a second time will fix this.
Functionality (<i>including start stop of daemons, and which</i>)	OK	
SAM/Nagios/Gstat or any other monitoring framework (<i>specify the name of the</i>	OK	https://gridppnagios.physics.ox.ac.uk/nagios/cgi-bin/status.cgi?host=ceprod05.grid.hep.ph.ic.ac.uk

<i>machine)</i>		
Interaction integration with other components (<i>specify which</i>)	WARN	SGE (there is still a problem with the sge bdii component, though Roberto assures me the fix will go in eventually, GGUS 83352)
Behaviour in production environment (after a few days). <i>Specify VO's using the service when applicable</i>	OK	
GGUS tickets opened: <i>please insert the URLs of the tickets</i>	1	https://ggus.eu/tech/ticket_show.php?ticket=91688
Log files: usefulness, clarity, etc., any other comments on where/how to improve them.	WARN	The default size of the cream-ce log files is way too small – on an average production system it only covers a couple of hours, and the location to change this (/etc/glite-ce-cream/log4j.properties) is not exactly intuitive.
Error messages: please specify or comment any issues with error messages, if they are not correct, not clear, useful, etc. .
