The present Operational Level Agreement (“the Agreement”) is made between **EGI Foundation (the Customer)** and **CESGA (the Provider)** to define the provision and support of the provided services as described hereafter. Representatives and contact information are defined in Section 6.

The European Space Agency (ESA) funded Terradue for the development of the e-Collaboration for Earth Observation (e-CEO) platform, to support on-line Data Challenges where researchers have the opportunity to tackle new research problems in a “parallel and collaborative way” and to facilitate the comparison and evaluation of different problem-solving approaches. The platform is developed and operated by Terradue. The e-CEO platform leverages Terradue’s Cloud Brokering framework (based on OpenNebula), and has been already used with external providers (Interoute, Amazon EC2) and potentially others.

The User is a consortium represented by the **Terradue**.

This Agreement is valid from **01/01/2016 to 01/01/2020**.

Once approved, **this Agreement is automatically renewed**, as long as the Provider does not expressed decision to terminate the Agreement at least a month before end date of the Agreement.

The Agreement was discussed and approved by the Customer and the Provider **02/03/2016**.

The Agreement extends the Resource Center OLA¹ with following information:

1 The Services

Possible allocation types:

- Pledged - Resources are exclusively reserved to the Community and the job will be executed immediately after submission.
- Opportunistic - Resources are not exclusively allocated, but subject to local availability.
- Time allocation - Resources are available in fair share-like mode for a fixed time period.

Possible payment mode offer:

- Sponsored - Model where the customer uses services that are funded, or co-funded, by the European Commission or government grants.
- Pay-per-use - Model where customer directly pay for the service used.
