The present Operational Level Agreement ("the Agreement') is made between **EGI.eu** (the **Customer**) and **GRNET** (the **Provider**) to define the provision and support of the provided services as described hereafter. Representatives and contact information are defined in Section 6.

The European Space Agency (ESA) funded Terradue for the development of the e-Collaboration for Earth Observation (e-CEO) platform, to support on-line Data Challenges where researchers have the opportunity to tackle new research problems in a "parallel and collaborative way" and to facilitate the comparison and evaluation of different problem-solving approaches. The platform is developed and operated by Terradue. The e-CEO platform leverages Terradue's Cloud Brokering framework (based on OpenNebula), and has been already used with external providers (Interoute, Amazon EC2) and potentially others.

This Agreement is valid from 01/04/2016 to 01/01/2017.

The Agreement was discussed and approved by the Customer and the Provider 28/03/2016

The Agreement extends the Resource Center OLA¹ with following information:
