The present Operational Level Agreement (“the Agreement”) is made between **EGI Foundation (the Customer)** and **IISAS-FedCloud (the Provider)** to define the provision and support of the provided services as described hereafter. Representatives and contact information are defined in Section 6.

The communities addressed by the D4Science Infrastructure are the ones served by a number of initiatives and projects powered by it such as iMarine, SoBigData, BlueBRIDGE, Parthenos, EGIP, Descramble and others. They are interested in performing data analysis on biological, social, geothermal, satellite, and environmental data. To this aim, D4Science uses two types of services that have been properly packaged and made available as Virtual Appliances.

The User is a consortium represented by the **CNR Istituto di Scienza e Tecnologie dell' Informazione A. Faedo**.

This Agreement is valid from **01/09/2016** to **31/12/2017**.

The Agreement was discussed and approved by the Customer and the Provider **19/08/2016**.

The Agreement extends the Resource Center OLA¹ with following information:

1 The Services

Possible access types:

- Pledged - Resources are exclusively reserved to the Community and the job will be executed immediately after submission
- Opportunistic - Resources are not exclusively allocated, but subject to local availability
- Time allocation - Resources are available in fair share-like mode for a fixed time period.

The Services are defined by the following properties:

Cloud Compute (category: Compute)

Cloud Compute gives you the ability to deploy and scale virtual machines on-demand. It offers guaranteed computational resources in a secure and isolated environment with standard API access, without the overhead of managing physical servers. Cloud Compute offers the possibility to select pre-configured virtual appliances (e.g. CPU, memory, disk, operating system or software) from a catalogue replicated across all EGI cloud providers.

- Resource Centre: IISAS-FedCloud (Slovak)
 - Cloud Compute
 - Number of Virtual CPU cores: 20
 - 5 VMs with 4 cores
 - Memory: 40 GB, 8 GB/VM
