

Minutes Grid Operations Meeting 11 October 2010

Attendance 35 people

- Information (Mario)

- glite migration (deadline for feedback and comments is today 11 October)

- It's expected that NGIs give feedback at the meeting

- open GGUS tickets

https://gus.fzk.de/ws/ticket_info.php?ticket=62645 -> Italy

https://gus.fzk.de/ws/ticket_info.php?ticket=62647 ->

France

- Operations tools deployment (Emir)

- CA deployment: Nagios/SAM probes need to be updated before broadcast to production sites.

To summarize CA changes:

- the problem is propagation of new version of SAM CA check over NGI Nagioses

- the proposed solution is to have script which will automatically calculate age of CA dist on nodes based on some online page (e.g. file with the latest version & release date)

- in addition - add further checks for CA validity (e.g. fingerprints or hashes of CAs which should be there)

- COD issues (Malgorzata)

1. Case transferred to political instances:

* Problem with Gstat test - site is waiting for release

https://gus.fzk.de/ws/ticket_info.php?ticket=61887&from=ID

2. Availability/reliability statistics for August 2010

https://gus.fzk.de/ws/ticket_info.php?ticket=61797

Summary:

* 1 site suspended

* 10 sites didn't provided explanations - cases pass to C00

Advices for next reports:

* please keep deadlines - you have 7 working days to provide explanations

* please do not put as an explanation that site administrator was on holidays

In case of administrators holidays site should provide administrator deputy.

If it is not possible then NGI should put site which is failing in downtime.

Tickets for availability/reliability reports for September will be soon created !
