

## Day 2 - Practice Session 1: Instructions for accessing Jupyter Notebooks

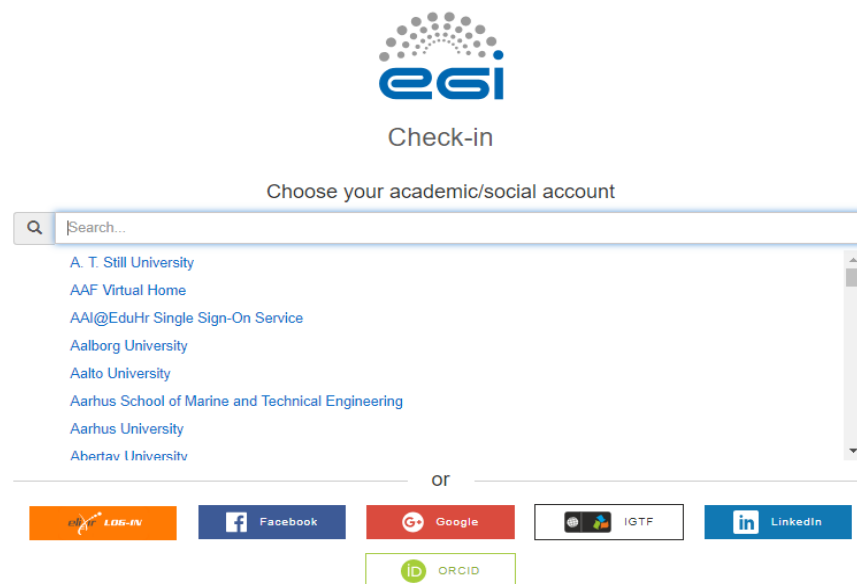

This document provides the instructions for accessing EGI hosted Jupyter notebooks for data-intensive analysis on cloud resources, provided by the EGI Federation.

### Access Jupyter

1. Enter the following URL in a browser: <https://envri-notebooks.fedcloud-tf.fedcloud.eu>
2. Start the authentication process by clicking on the “Sign in with EGI Check-In” button as shown in the figure below:

An orange rectangular button with the text "Sign in with EGI Check-in" in white.

3. Select the **Identity Provider** you belong to from the discovery page:
  - a. Browse through the list of Identity Providers to find your Home Organisation; or, alternatively,
  - b. Type the name of your Home Organisation in the search box. Note that this filter only matches entries within the currently selected view (tab) of Identity Providers and is language-dependent (locale of your browser).

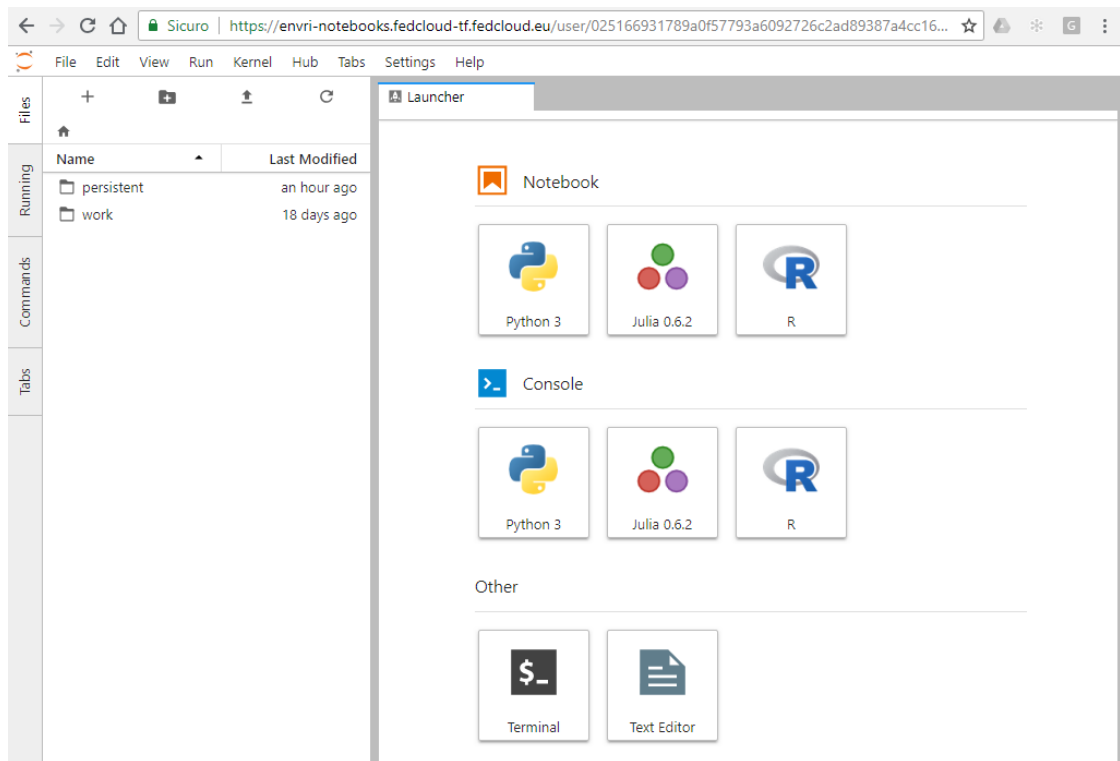

### **Important:**

Use one of your social accounts to login the server. Currently: **Google**, **Facebook** and **LinkedIn** and **ORCID** are supported.

**During the lab sessions, students are kindly invited to use their own ORCID iD accounts. To register for an ORCID iD, use the registration form: <https://orcid.org/register>.**

4. Following successful authentication, you will see the control panel:

5. Launch your Notebook, with the desired Kernel, and start working with it.

### Contacts:

Should you have comments, please contact: [giuseppe.larocca@egi.eu](mailto:giuseppe.larocca@egi.eu) and [enol.fernandez@egi.eu](mailto:enol.fernandez@egi.eu)
