The present Service Level Agreement (“the Agreement”) is made between **EGI Foundation (the Service Provider)** and **Terradue – NextGEOSS Pilots (the Customer)** to define the provision and support of the provided services as described hereafter. Representatives and contact information are defined in Section 6.

GEOSS (Global Earth Observation System of Systems) is a coordinated effort of GEO’s mission to improve EO data management and exploitation systems’ interoperability (at technical, semantic, organisational levels). The NextGEOSS project, a European contribution to GEOSS, proposes to develop the next generation data hub and platform for Earth Observations, where the users can connect to access data and to deploy EO-based applications. The concept revolves around providing the data and resources to the user communities, including Cloud Computing resources, connected to provide an integrated work environment for application builders. An essential asset of NextGEOSS is the strong emphasis put on engaging the communities of providers and users and bridging the space in between.

The Customer is a NextGEOSS consortium partner: **Terradue**.

This Agreement is valid from **28 August 2017** to **31 May 2020** and defines the agreed upon resources provided for 10 NextGEOSS Pilots, namely:

1. VITO “Sentinel-2 Biopar Crop Monitoring” application
2. ARMINES “Gridded data” and “Urban Solar Radiation Mapping” applications
3. WNER (previously WUR ALTErrA) “Maxent Habitat Monitoring” application
4. SATCEN “Change Detection” application
5. NERSC “Cold Regions products” application
6. DLR “Megacities Air Pollution and Health” application
7. CLS “Ocean Drift Modelling” application
8. NOAA “Multi-hazard Enhanced Risk Assessment” application
9. DEIMOS “Territorial Planning” application
10. ITC “Essential Biodiversity Variables” application

The Agreement was discussed and approved by the Customer and the Provider on **August 30th, 2019**.
