The present Operational Level Agreement (“the Agreement”) is made between **EGI Foundation (the Service Provider)** and **CESGA (the Component Provider)** to define the provision and support of the provided services as described hereafter. Representatives and contact information are defined in Section 6.

Open Universe is an initiative proposed by Italy at the CORPUS session of June 2016 where it was agreed that it will be part of the activities in preparation of UNISPACE +50¹. The main objective of Open Universe is to stimulate a dramatic increase in the utilization of space science data (e.g. astrophysics, planetary science, cosmic rays, etc.), extending the potential of scientific discovery to new participants in all parts of the world. A wide range of communities will benefit from Open Universe: professional scientists, citizen scientists, teachers and students, potentially any citizen interested in space science.

The Customer is a consortium represented by **ICRANet**².

This Agreement is valid from **01/05/2018** to **01/05/2020**.

Once approved, **this Agreement is automatically renewed**, as long as the Provider does not express a decision to terminate the Agreement at least a month before the end date of the Agreement.

The Agreement was discussed and approved by the Customer and the Provider **20/03/2019**.

The Agreement extends the Resource Center OLA³ with the following information:

1 The Services

Possible allocation types:

- Pledged - Resources are exclusively reserved to the Community and the job will be executed immediately after submission.
- Opportunistic - Resources are not exclusively allocated, but subject to local availability.
- Time allocation - Resources are available in fair share-like mode for a fixed time period.

Possible payment mode offer:

- Sponsored - Model where the customer uses services that are funded, or co-funded by the European Commission or government grants.
- Pay-per-use - Model where customers directly pay for the service used.
