The present Operational Level Agreement (“the Agreement”) is made between **EGI Foundation (the Service Provider)** and **RECAS-BARI (the Component Provider)** to define the provision and support of the provided services as described hereafter. Representatives and contact information are defined in Section 6.

The **European Multidisciplinary Seafloor and water column Observatory (EMSO)**<sup>1</sup> aims to explore the oceans and to explain the critical role they play in the broader Earth systems, focussing on climate change, risks of biodiversity loss, and natural hazards. EMSO's observatories are platforms equipped with multiple sensors to measure biogeochemical and physical parameters such as ocean temperature, dissolved oxygen concentration, and ocean current speed and direction.

EMSO consists in a system of regional facilities placed at key sites around Europe, from North East to the Atlantic, through the Mediterranean, to the Black Sea. Observatories are platforms equipped with multiple sensors, placed along the water column and on the seafloor. They constantly measure different biogeochemical and physical parameters, that address natural hazards, climate change and marine ecosystems.

EMSO is a consortium of partners sharing in a common strategic framework scientific facilities (data, instruments, computing and storage capacity). Formally it is a European Research Infrastructure Consortium (ERIC), legal framework created for pan-European large-scale research infrastructures.

The User is a consortium represented by the EMSO-ERIC project.

This Agreement is valid from **01/12/2019** to **31/12/2020**.

Once approved, **this Agreement is automatically renewed**, as long as the Provider does not expressed decision to terminate the Agreement at least a month before the end date of the Agreement.

The Agreement was discussed and approved by the Customer and the Provider **19/11/2019**.

The Agreement extends the Resource Center OLA<sup>2</sup> with the following information:
