The present Operational Level Agreement (“the Agreement”) is made between **EGI Foundation (the Service Provider)** and **INCD (the Component Provider)** to define the provision and support of the provided services as described hereafter. Representatives and contact information are defined in Section 6.

The OPENCoastS service assembles on-demand circulation and water quality forecast systems for selected coastal areas and keeps them running operationally for a period defined by the user. This service generates daily forecasts of hydrodynamics (water levels, velocities, wave parameters, salinity and temperature) and water quality (generic tracer, fecal contamination indicators) over the region of interest for 48 hours, based on numerical simulations of the relevant physical processes.

The Customer is a consortium represented by the **LNEC**

This Agreement is valid from **01/05/2021** to **30/06/2023**.

Once approved, **this Agreement is automatically renewed**, as long as the Component Provider does not express a decision to terminate the Agreement at least a month before the end date of the Agreement.

The Agreement was discussed and approved by the EGI Foundation and the Component Provider on **20/01/2021**.

The Agreement extends the Resource Center OLA¹ with the following information:
