

## Applications and gateways for the LSGC: EGI's role as a helper and supporter

Steve Brewer, Chief Community Officer,  
EGI.eu

[steve.brewer@egi.eu](mailto:steve.brewer@egi.eu)

I am here primarily to listen, but first...

I have a story to tell...

1. Managing a sustainable infrastructure
2. Building sustainable user services
3. Cultivating sustainable communities

Where do you fit in?

1. Managing a sustainable infrastructure
  - Background – Data deluge, Grid, infrastructure, EGI
  - Resource infrastructure, EGI-InSPIRE project
  - Virtuous Service Cycle, EGI supporting innovation
2. Building sustainable user services
  - User Support structure
  - Support services
  - Processing requirements, website
3. Cultivating sustainable communities
  - VRCs
  - Life Sciences Grid Community (LSGC)
  - What happens next for Life Sciences community

## 1) Managing a sustainable infrastructure

# The Data Deluge

Barcelona  
Super  
Computer

The LHC

The Geocentric universe, pre-1500

Michael Faraday's laboratory, 1830s

Leiden University chained library 1610

# What is a Grid?

- A grid consists of distributed resources controlled by separate organisations that be systematically used securely by users external to that organisation
- Resources can include:
  - Commodity or HPC clusters
  - Disk or tape storage
  - Instruments
  - Data Archives or Digital Libraries

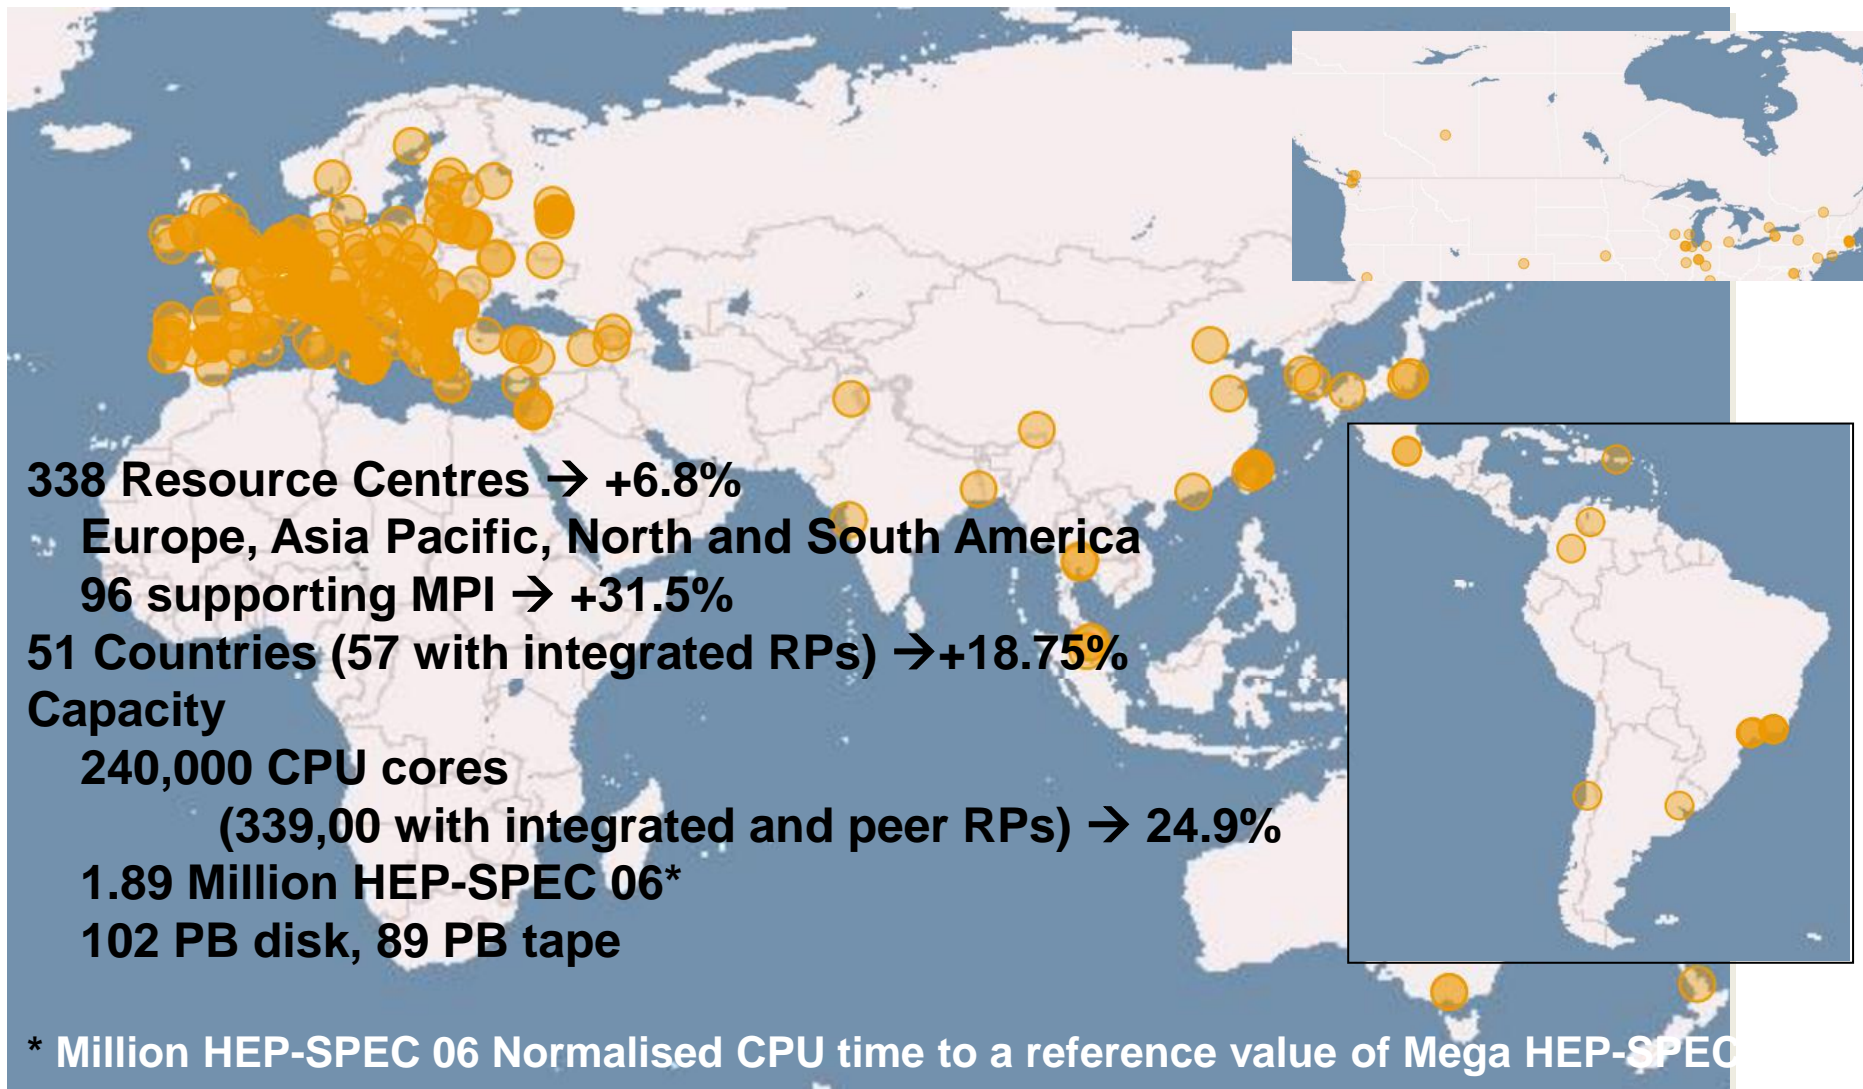

Infrastructure is the basic physical and organisational structures needed for the operation of a society or enterprise, or the services and facilities necessary for an economy to function

The Enterprise is the European Research Area

EGI provides a service infrastructure that exposes and helps coordinate a resource infrastructure

# Resource Infrastructure

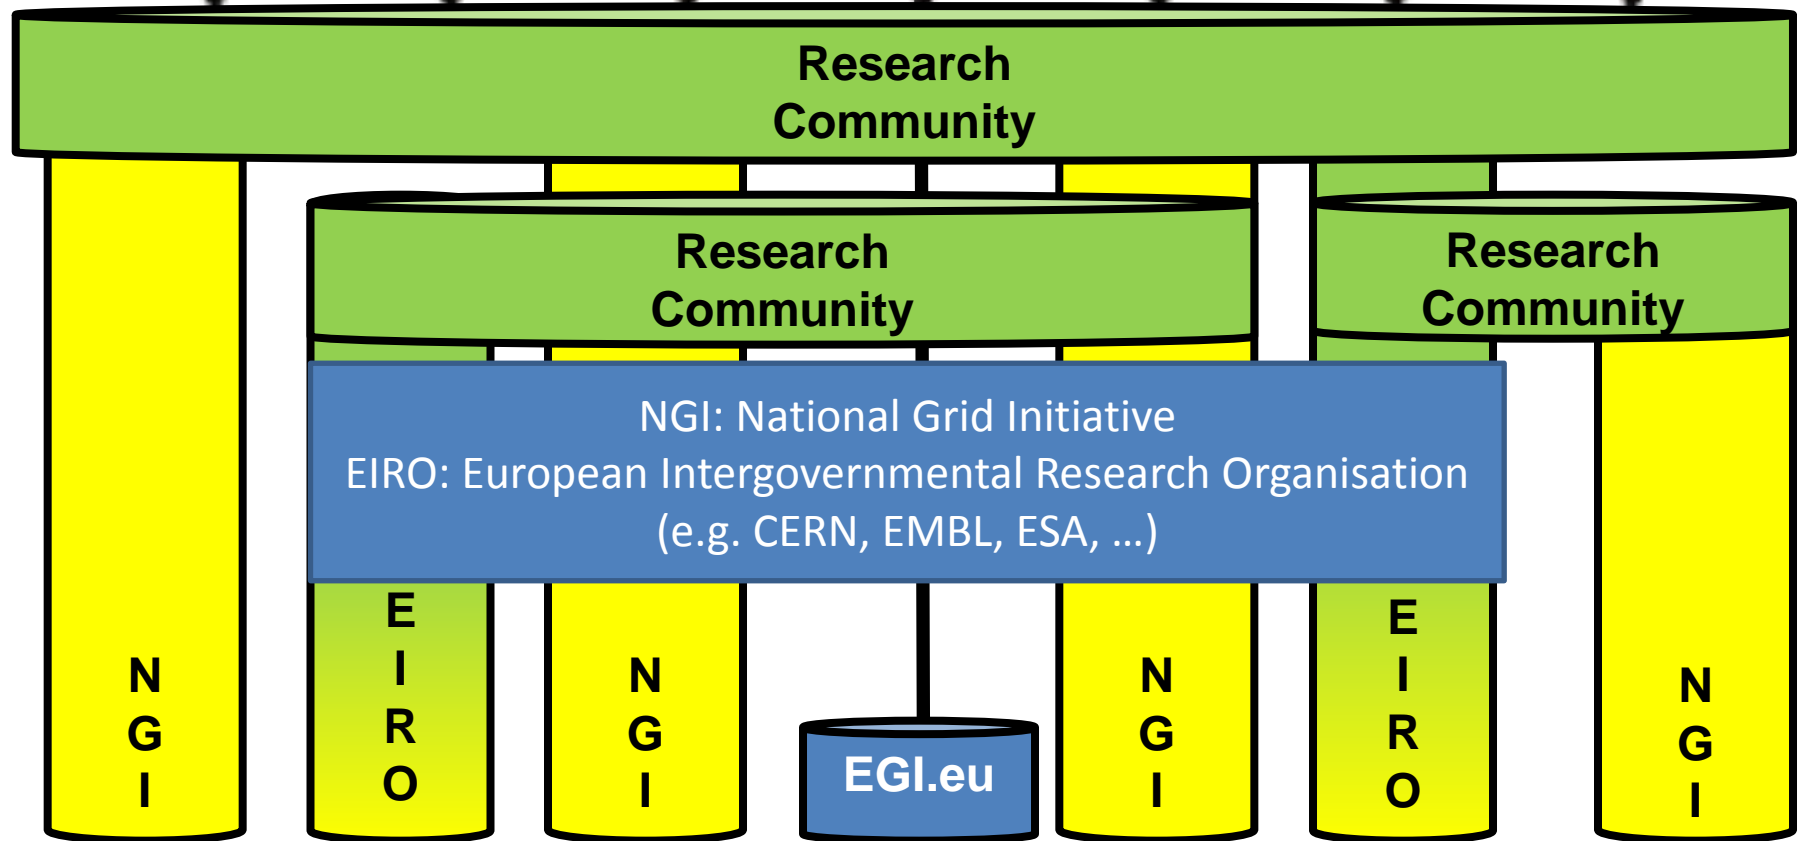

(Showing yearly increase)

# EGI

## Collaboration

**Integrated:** infrastructure operated by a non-EGI-InSPIRE partner but relying on EGI operational services (MoU)

**Peer:** infrastructure accessible to EGI users, but relying on own operational services

- Coordination for European Grid resources
  - Established February 8th 2010
  - Central policy & services needed to run a grid
  - Sustainable small coordinating organisation
- Based in Amsterdam
  - Coordinating core (~20 people) in Amsterdam
  - Technical services from partners (~20 people)

EGI and EGI.eu supported by EGI-InSPIRE project

# EGI-InSPIRE Project

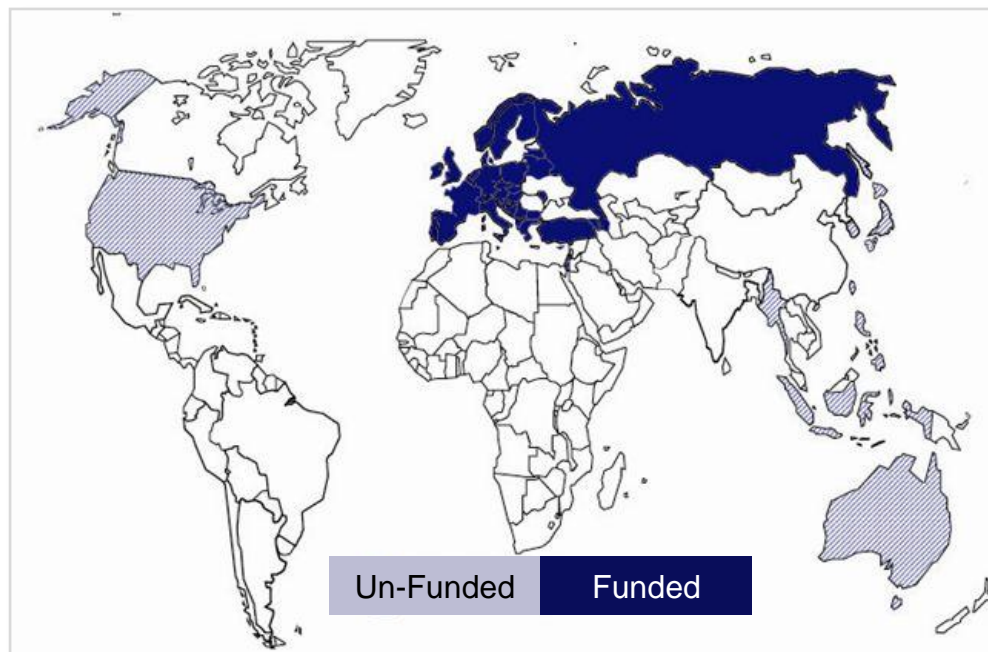

**I**ntegrated **S**ustainable **P**an-European **I**nfrastructure for  
**R**esearchers in **E**urope

A 4 year project with €25M EC contribution

- Project cost €72M
- Total Effort ~€330M
- Effort: 9261PMs

## Project Partners (50)

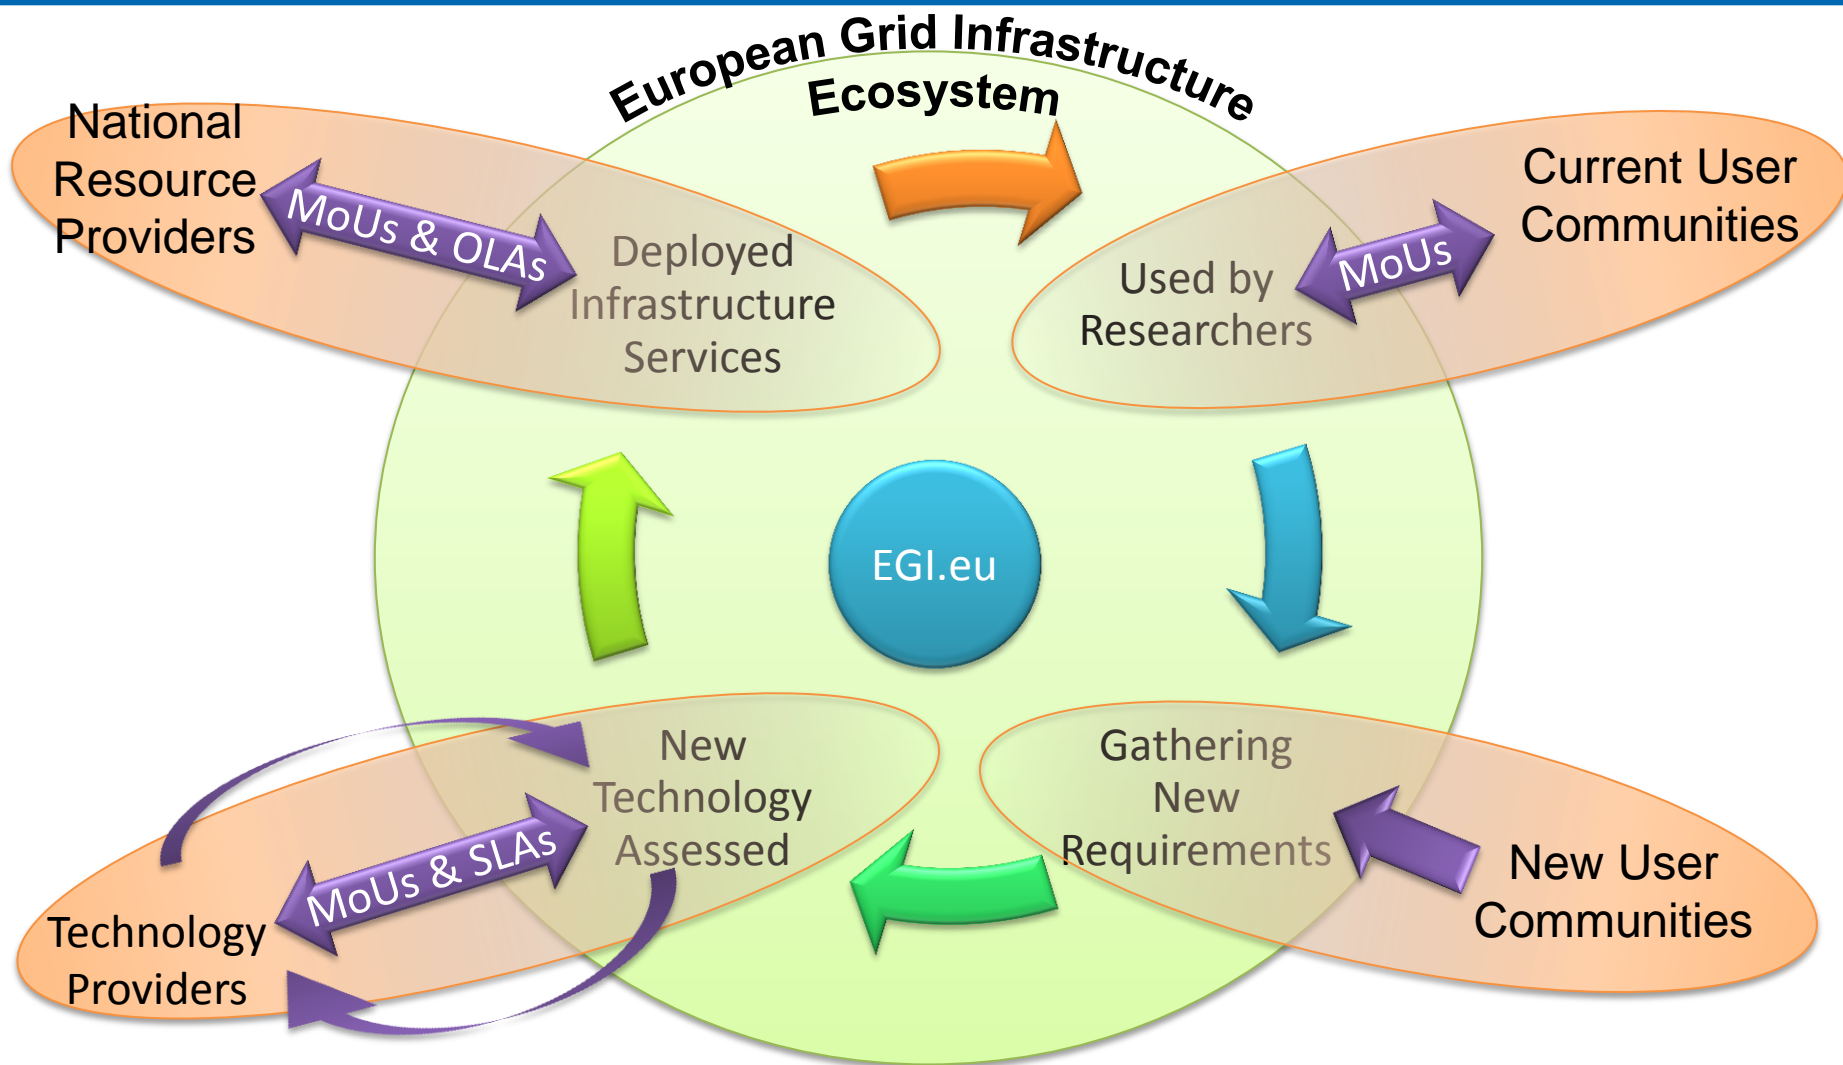

EGI.eu, 38 NGIs, 2 EIROs  
Asia Pacific (9 partners)

- A sustainable production infrastructure
  - Resource providers in Europe and worldwide
  - With new technologies as they mature
- Support structured international research
  - Sustain current domain specific services
  - Attract new user communities (e.g. ESFRI)

# A Virtuous Service Cycle

- Deploy Technology Innovation
  - Distributed Computing continues to evolve
    - To include: Grids, Desktops, Virtualisation, Clouds, ...
- Enable Software Innovation
  - Provide reliable persistent technology platform
    - Tools built on gLite/UNICORE/ARC/Globus
- Support Research Innovation
  - Infrastructure for data driven research
    - Support for international research (e.g. ESFRI)

- EGI is what you make of it!
  - Many national resources already engaged
  - Easy to federate in new resources
  - You retain control as to which VOs can use it
- Mature services to expose resources
  - Ideal for large-scale data analysis
- Platform for collaborative sharing
  - Across compute, data, ....

## 2) Building sustainable user services

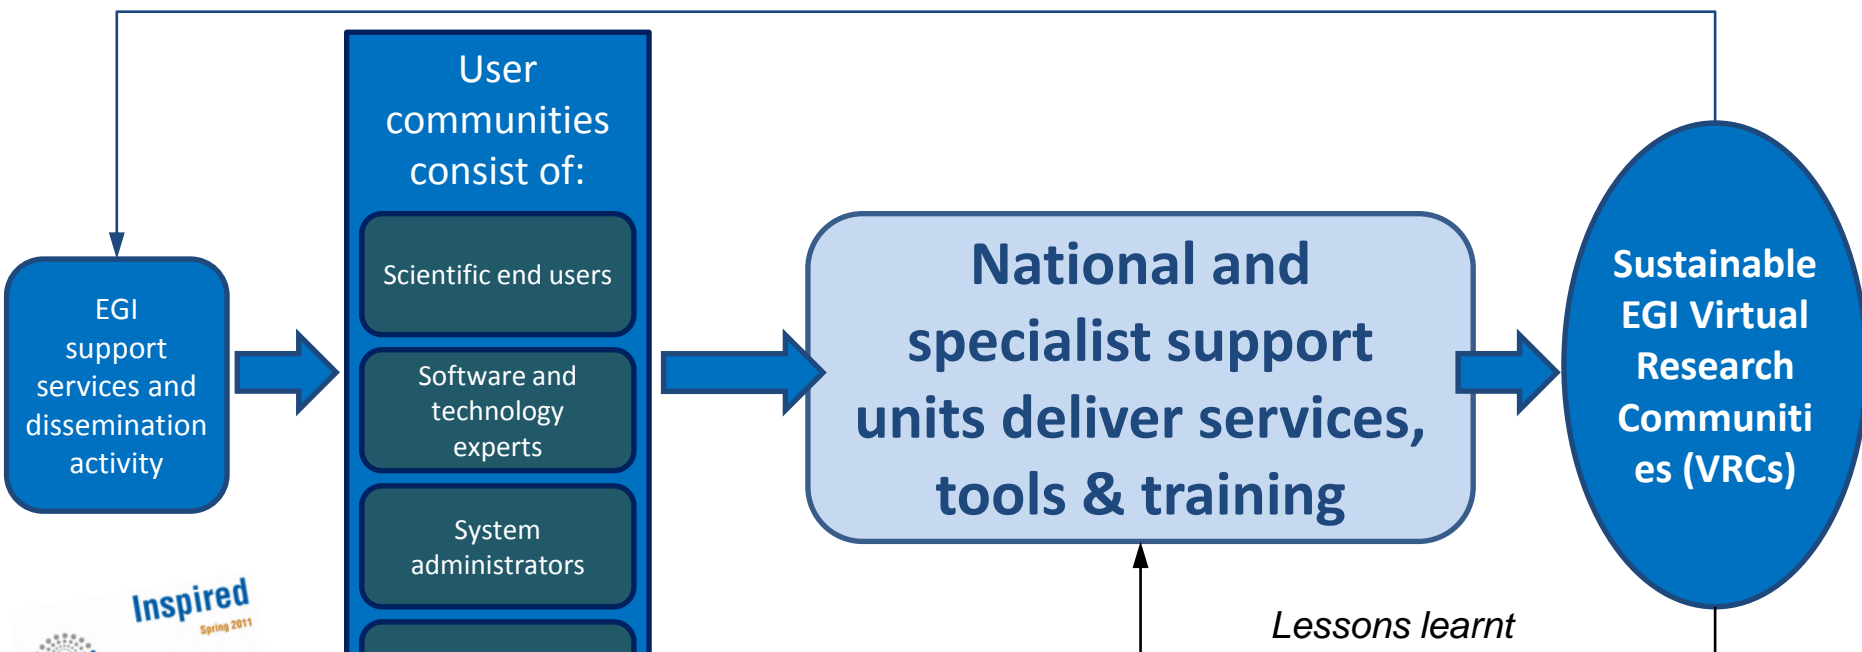

[www.egi.eu/usersupport](http://www.egi.eu/usersupport)

- Support User Communities:
  - Researchers in International Collaborations (VRCs)
  - National Research Collaborations through the NGI
  - Scale up from the single VO to a community
- Provide core services to support users:
  - Manage VOs, AppDB, Training Services, Requirements
- Support teams:
  - EGI.eu User Community Support Team
  - NGI User Support Teams
  - NGI Operations Teams
  - Experts within user communities or projects

# Support coordination: cultivating sustainable communities

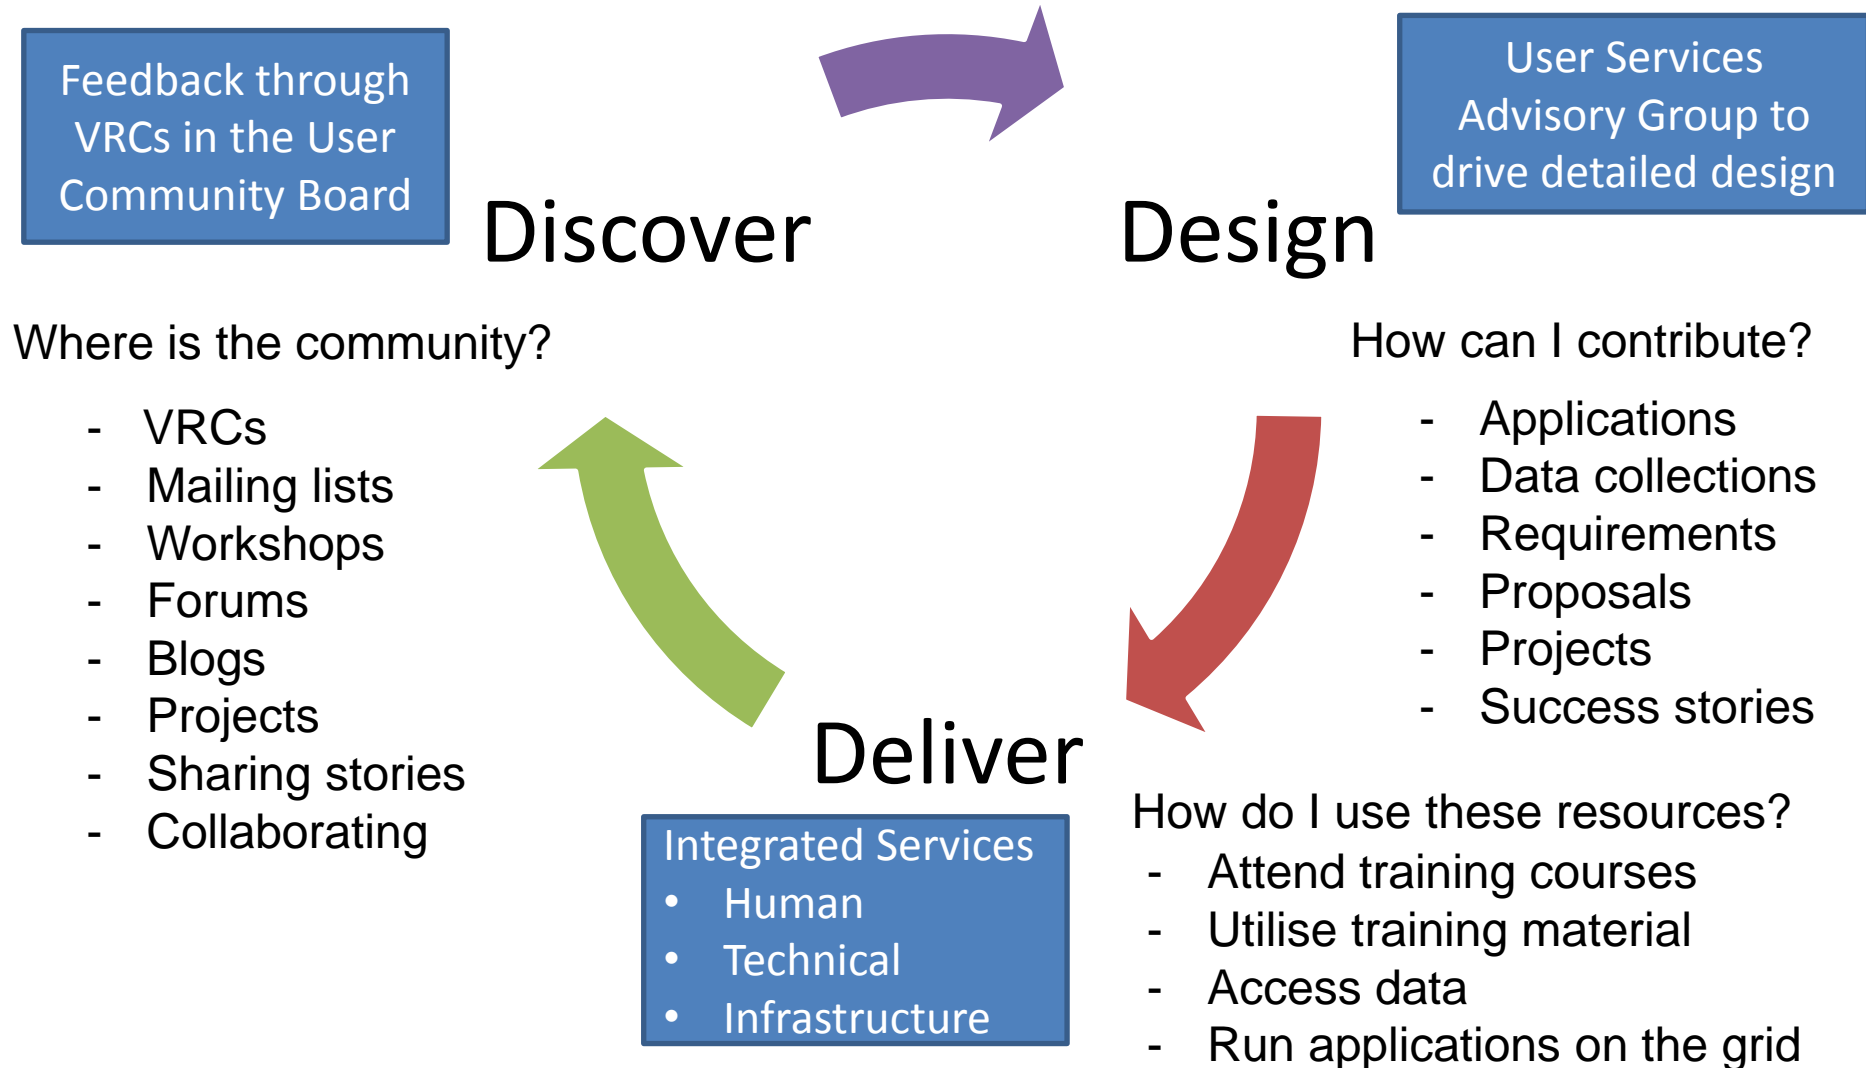

*Success stories, user requirements, application details and training information*

**Sustainability of user communities is the key to achieve a sustainable e-Infrastructure.**

# Coordinating support: developing and deploying sustainable services

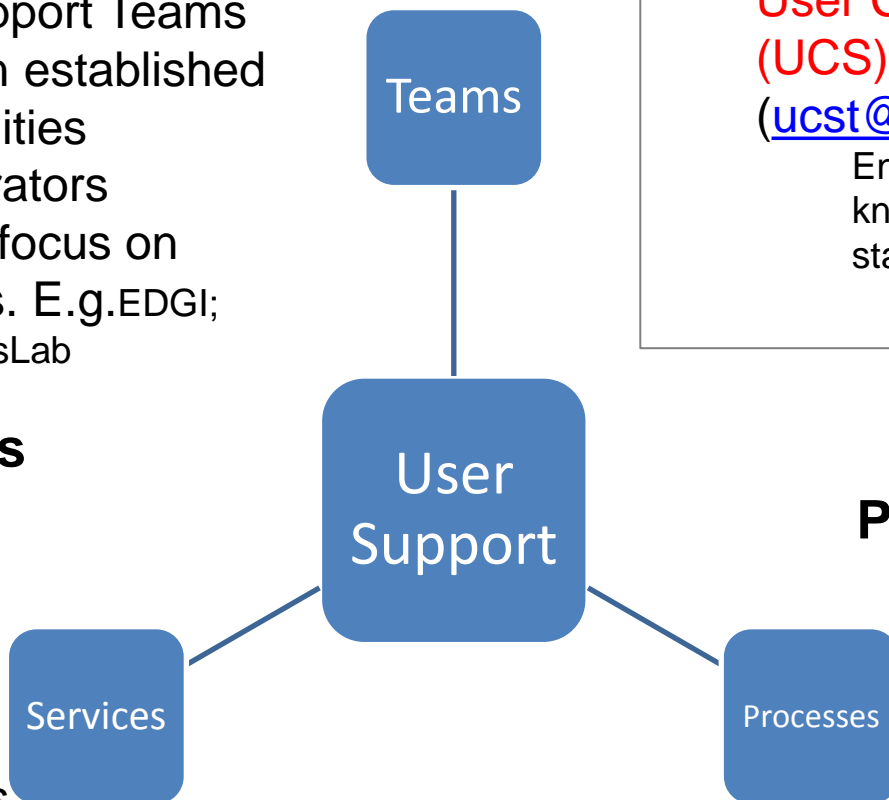

# User Support structure

## Support teams

- NGI User Support Teams
- Experts within established user communities
- Site administrators
- Projects with focus on specific areas. E.g. EDGI; MAPPER; StratusLab

## Technical services

- Application Database
- Training Marketplace
- VO services
- Requirements Tracker

## User Support Coordination

**User Community Support (UCS) team of EGI.eu**  
([ucst@egi.eu](mailto:ucst@egi.eu))

Ensures the flow of information, knowledge and solutions among stakeholders

## Processes

- User Community Board
- VRC accreditation
- Requirements processing
- Training Working Group

## NGI User Support Teams provide:

- Consultancy & training
- Access to grid services
- Application porting
- Developing and operating software services
- Collecting feedback
- Documentation & helpdesk

## NGIs receive:

- Web & wiki resources
- Requirements process
- Applications and services
- VRC coordination support

**Support teams are available across 50 partners – they are all different... as are their support skills.**

Provided by a few NGIs **for the whole community**

- To facilitate the work of NGI support teams
- To improve communication among NGIs, **among** users and **with** users

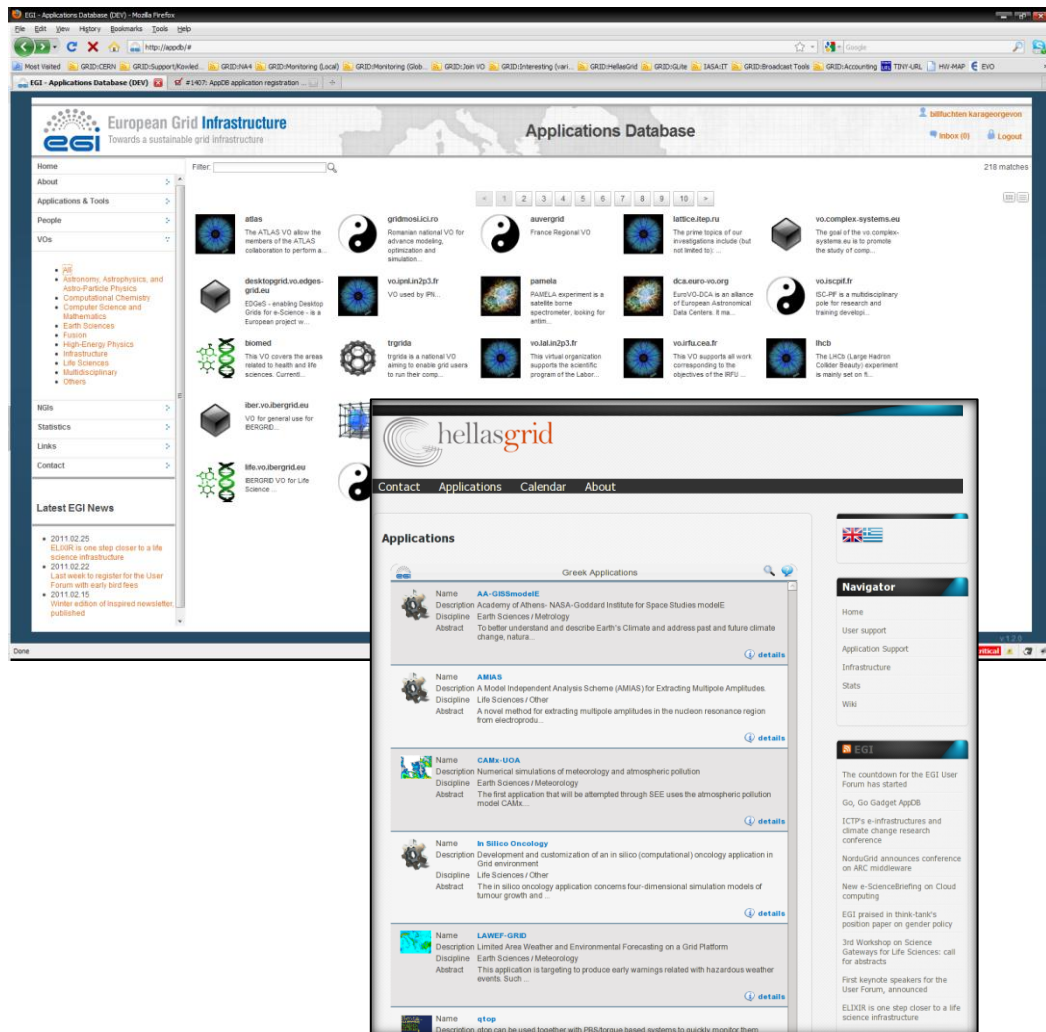

Tools and services:

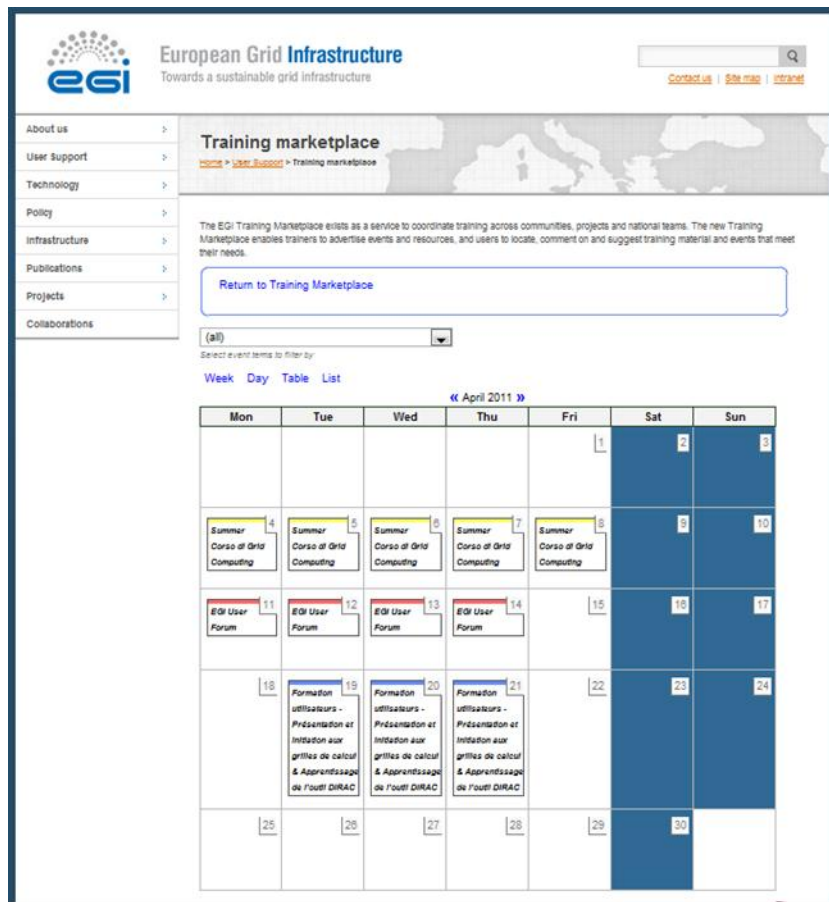

1. **EGI Application Database** (GRNET)
  - Domain specific application – for scientific end users
  - Reusable toolkits and services – for NGI support teams
2. **Services for VOs** (CSIC; LIP)
  - Tools, manuals, assistance for VO setup and management
3. **Training Marketplace** (STFC, UK)
  - Repository of events and materials
  - Place to request and provide NGI training services
4. **Requirement Tracker** (EGI.eu with CESNET)
  - To capture needs from the whole community
  - To offer solutions from NGIs

## Benefits of AppDB:

- gives recognition to reusable applications
- gives recognition to application developers
- How to get involved?
  - Register applications
  - Reuse applications
  - **Integrate AppDB through its gadget into any Webpage!**

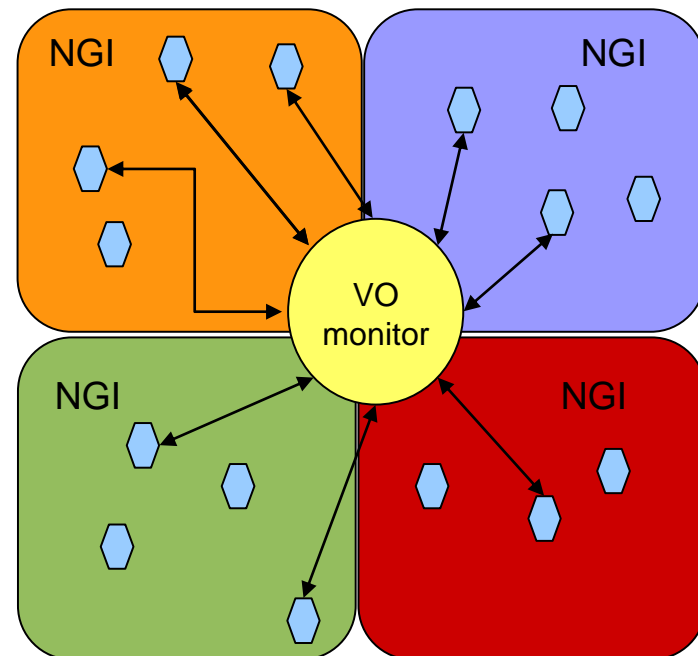

The screenshot shows the EGI Training Marketplace website. The header includes the EGI logo, the text 'European Grid Infrastructure Towards a sustainable grid infrastructure', and navigation links for 'Contact us', 'Site map', and 'Intranet'. A sidebar on the left lists various categories: About us, User support, Technology, Policy, Infrastructure, Publications, Projects, and Collaborations. The main content area is titled 'Training marketplace' and includes a description of the service. Below this, there is a search bar and a filter dropdown set to '(all)'. A calendar view for April 2011 is displayed, showing training events on specific dates. The events listed include 'Summer Corso di Grid Computing' (April 4-8), 'EGI User Forum' (April 11-14), and 'Formation utilisateurs - Présentation et initiation aux grilles de calcul & Apprentissage de l'outil DIRAC' (April 18-21).

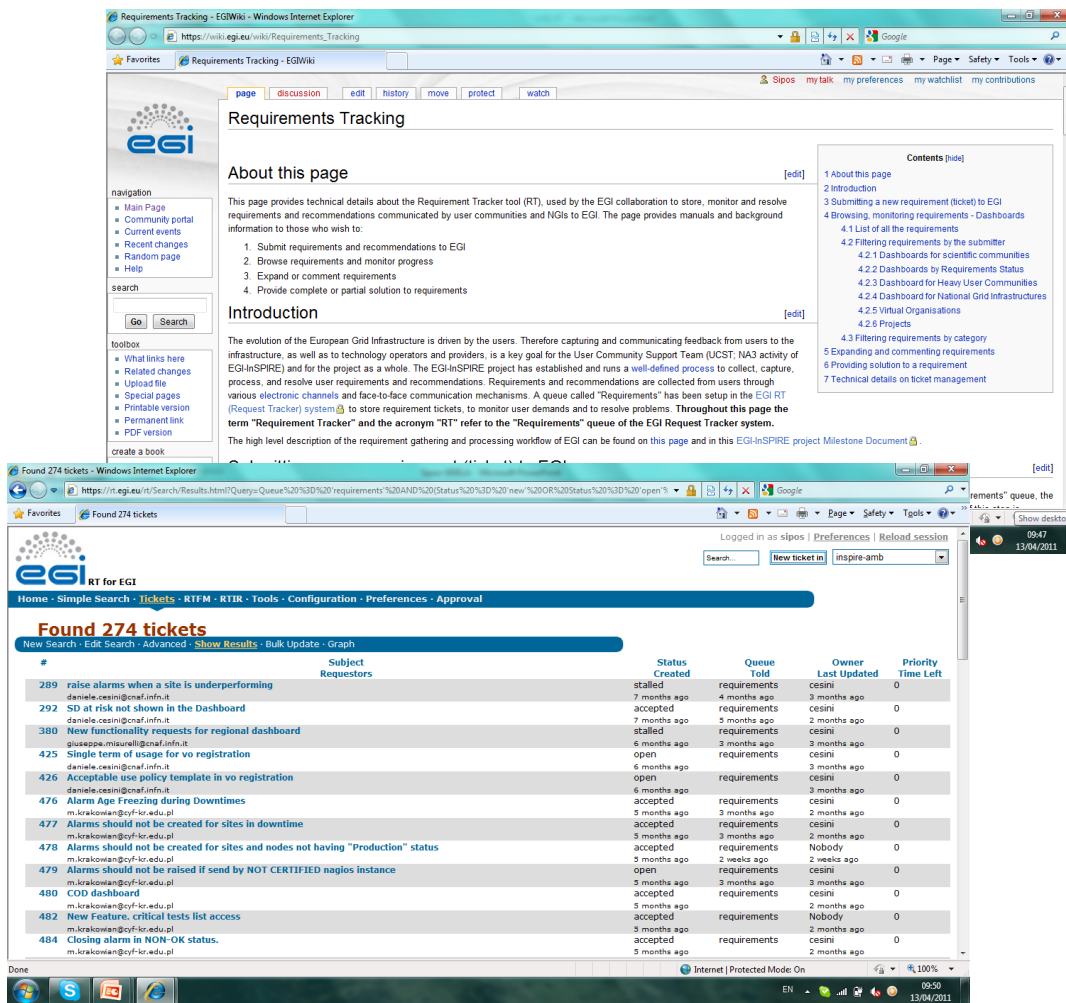

- Integration of:
  - training event calendar
  - Digital library (of training materials)
  - Service offering & requesting form
- How to get involved?
  - Register training events
  - Use, reuse and share training materials
  - Offer training-related services (infrastructure, VO, CA, ...)
  - Feed training-requirements
  - Delegate representative to EGI Training Working Group

You can offer and request ANY type of training-related service, tool, expertise through the new Training Marketplace

- Activities:
  - Consultancy and helpdesk for VO managers
  - Evaluation of VO management, monitor and accounting tools
  - Provision of VO support software for VRCs
- VO-specific monitoring:
  - Monitor only those sites that support you
  - Create and plug-in VO-specific probes
- How to get involved?
  - Request support
    - [vo-services@mailman.egi.eu](mailto:vo-services@mailman.egi.eu)
  - Prepare and share reviews of VO tools
  - Offer local solutions for VOs through the group

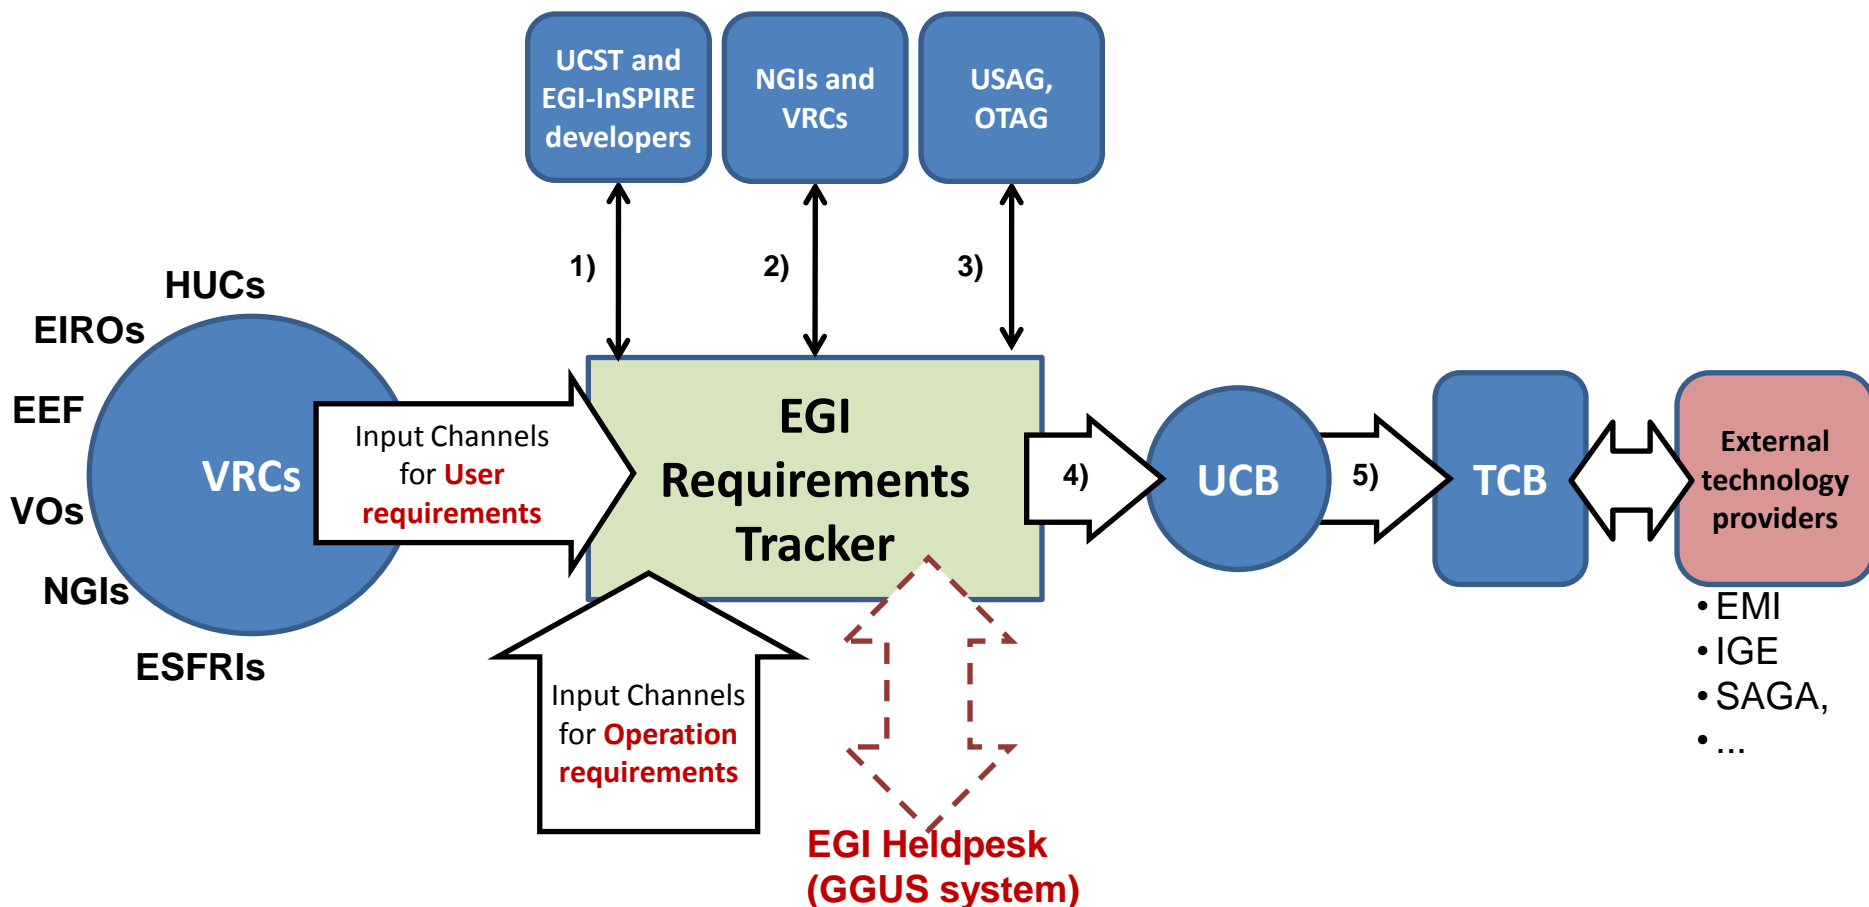

- **Permanent** storage for EGI requirements
  - User
  - Operational
- **Complete transparency**
  - For user communities
  - For NGIs
  - For technology providers
- Requirement submission interface
- Query interfaces
- Manuals available

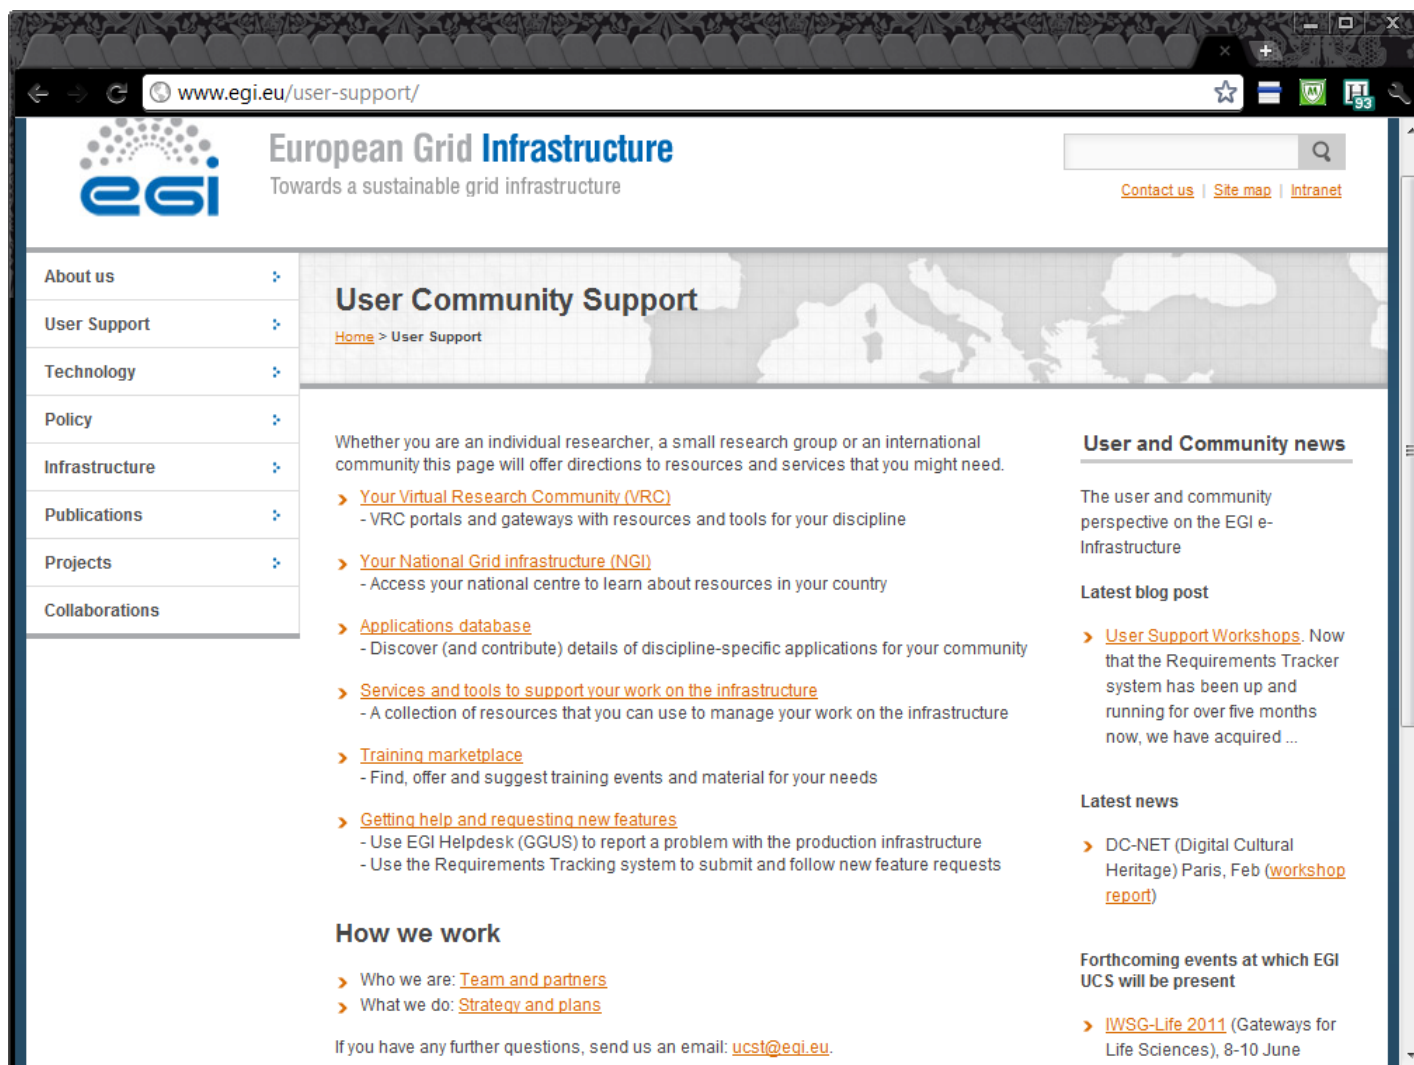

The screenshot displays the Requirements Tracker (RT) web interface. The top section, 'About this page', provides technical details about the RT tool and lists navigation links. The bottom section, 'Found 274 tickets', shows a table of requirements with columns for ID, Subject, Status, Queue, Owner, and Priority. The table lists various requirements, including 'raise alarms when a site is underperforming' and 'SD at risk not shown in the Dashboard'.

#	Subject	Status	Queue	Owner	Priority
289	raise alarms when a site is underperforming	stalled	requirements	cesini	0
292	SD at risk not shown in the Dashboard	accepted	requirements	cesini	0
380	New functionality requests for regional dashboard	stalled	requirements	cesini	0
425	Single term of usage for vo registration	open	requirements	cesini	0
426	Acceptable use policy template in vo registration	open	requirements	cesini	0
476	Alarm Age Freezing during Downtimes	accepted	requirements	cesini	0
477	Alarms should not be created for sites in downtime	accepted	requirements	cesini	0
478	Alarms should not be created for sites and nodes not having "Production" status	accepted	requirements	Nobody	0
479	Alarms should not be raised if send by NOT CERTIFIED nagios instance	open	requirements	cesini	0
480	COD dashboard	accepted	requirements	cesini	0
482	New Feature, critical tests list access	accepted	requirements	Nobody	0
484	Closing alarm in NON-OK status.	accepted	requirements	cesini	0

# Processing EGI requirements, implementing solutions

The screenshot shows the EGI User Community Support page. The header includes the EGI logo, the text "European Grid Infrastructure" and "Towards a sustainable grid infrastructure", a search bar, and links for "Contact us", "Site map", and "Intranet". A left sidebar contains a navigation menu with links to "About us", "User Support", "Technology", "Policy", "Infrastructure", "Publications", "Projects", and "Collaborations". The main content area is titled "User Community Support" and includes a breadcrumb trail "Home > User Support". The text explains that the page offers directions to resources and services for individual researchers, small research groups, or international communities. It lists several key resources: "Your Virtual Research Community (VRC)" (VRC portals and gateways), "Your National Grid infrastructure (NGI)" (Access your national centre), "Applications database" (Discover details of discipline-specific applications), "Services and tools to support your work on the infrastructure" (A collection of resources to manage work), "Training marketplace" (Find, offer and suggest training events), and "Getting help and requesting new features" (Use EGI Helpdesk (GGUS) to report a problem, use the Requirements Tracking system to submit and follow new feature requests). A "How we work" section lists "Who we are: Team and partners" and "What we do: Strategy and plans". At the bottom, it provides an email address: ucst@egi.eu. On the right, there are sections for "User and Community news" (The user and community perspective on the EGI e-Infrastructure), "Latest blog post" (User Support Workshops, Now that the Requirements Tracker system has been up and running for over five months now, we have acquired ...), "Latest news" (DC-NET (Digital Cultural Heritage) Paris, Feb (workshop report)), and "Forthcoming events at which EGI UCS will be present" (IWSG-Life 2011 (Gateways for Life Sciences), 8-10 June).

## 3) Supporting sustainable communities

- What is a VRC?
  - Community of researchers
  - Shared technology or research interests
  - Technical implementation: Group of VOs
- Why be a VRC?
  - Effective coordination & integration with EGI
  - Build support structures within your community
- Constraints to being a VRC
  - Have supporting resources, i.e., supporting NGIs
  - Involve significant VOs, i.e., represent users

LSGC has just signed an MoU with EGI

- Application developers will be major element
- Portal and gateway developers too
- Developers are the bridge between research and the infrastructure
- Event such as IWSG-Life2011 and the HealthGrid conference bring such people together

MoU – Memorandum of Understanding

## The Life Sciences community:

- Clearly well established, however...
- Many new requirements to be satisfied
- Especially to increase researcher numbers

## How will this be achieved?

- Use of the existing EGI support services
- Participation in UCB
- Workshops, forums and road-shows

# Life-Science Grid Community

- **Timeline**

- June 2010: open workshop at the HealthGrid conference
- Agreed on a statement of goals and missions
- Monthly phone meetings

- **Participating user groups**

- VOs: biomed (catch-all), vlemmed, Isgrid
- German life-science user community
- Lifewatch

- **Supporting NGIs**

- Dutch, French, Italian, Spanish and Swiss

- **Hosting body**

- HealthGrid, a non-profit association

# Purposes and goals (1)

- **Represent the LS grid users, in particular to**
  - Negotiate resources
  - Promote their requirements
  - Liaise with the European Grid Infrastructure
  
- **Coordinate actions**
  - Serve as a contact point for new users
  - Share expertise in the community
  - Avoid replication of efforts
  - Define common requirements
  - Encourage sharing of resources, data and tools

# Purposes and goals (2)

- **Provide technical services**
  - Operate and support common VOs
  - Operate shared services
  - Provide targeted user support and application porting
- **Training and induction**
  - Organize community-specific training events
  - Smooth the learning curve, lower the start-up cost
- **Dissemination**
  - Transfer knowledge among VRC partners
  - Advertise actions
  - Liaise with other groups of interest

# More information

- **Contact**

- Wiki page: <http://wiki.healthgrid.org/LSVRC:Index>
- Mailing list: [lsvrc@healthgrid.org](mailto:lsvrc@healthgrid.org)

- **How to benefit from the LSGC?**

- Established VOs
  - Discuss technical issues with other VOs
  - Submit requirements to the EGI
  - Advertise your services ; use others'
- New communities
  - Join an existing VO and benefit from its expertise
  - Get information on related applications and porting efforts
  - Get application porting support
  - Browse training material and events

## IWSG-Life2011

- Capture latest developments and needs

## Life Sciences Grid Community

- Define new requirements; update AppDB
- Take stock of existing LS applications

## EGI

- Process LSGC requirements; plan user workshops

Thanks for your time!

[steve.brewer@egi.eu](mailto:steve.brewer@egi.eu)
