

# STAGED ROLLOUT REPORT

The Early Adopter team should fill the “grey” areas

NGI	UK				
Site Name	UKI-LT2-IC-HEP				
EA team names	Daniela Bauer				
EA team contacts	daniela.bauer.grid@googlemail.com				
Product	WMS	Version	3.3.4	RT ticket ID	3256

The “*outcome*” is one of: **OK**, **WARN**, **FAIL**, **NA** (Not Aplicable), **Nver** (Not verified/Not tested).

Copy/paste any results from your commands where you see fit.

Metric	<OK  WARN  FAIL  NA NVer>	WEB URLs, Command used, other comments (please always fill this table with as much information as possible, and as you see fit)
Release notes and other documentation	warn	Under WMS at <a href="http://www.eu-emi.eu/emi-1-kebnekaise-updates/-/asset_publisher/Ir6q/content/update-11-15-12-2011">http://www.eu-emi.eu/emi-1-kebnekaise-updates/-/asset_publisher/Ir6q/content/update-11-15-12-2011</a> it says “Check out the guide for more details.”. A link to this myterious guide would be appreciated.
Installation or upgrading ( <i>specify which</i> )	upgrading	Was a bit of a mess and it didn't help that I had test rpms installed. Probably not an issue in normal deployment.
(RE-)configuration ( <i>if using yaim, specify command used</i> )	OK	
Functionality ( <i>including start stop of daemons, and which</i> )	OK	Why is there a cron job called glite-lb-purge.cron on a standalone (i.e. LB on different machine) WMS ?
SAM/Nagios/Gstat or any other monitoring framework ( <i>specify the name of the machine</i> )	OK	
Interaction integration with other components ( <i>specify which</i> )	OK	LB on different machine.
Behaviour in production	OK	

environment (after a few days). <i>Specify VO's using the service when applicable</i>		
GGUS tickets opened: <i>please insert the URLs of the tickets</i>	N/A	
Log files: usefulness, clarity, etc., any other comments on where/how to improve them.	see below	
Error messages: please specify or comment any issues with error messages, if they are not correct, not clear, useful, etc. .		ice.log default setting is too high, it's almost impossible to find anything. Can statements like this: “2012-01-20 11:26:27,144 WARN - eventStatusPoller::body - DN [/O=GRID-FR/C=FR/O=CNRS/OU=LIMOS/CN=Romain Lardy-/biomed/Role=NULL/Capability=NULL] has not job on the CE [https://ce3.ui.savba.sk:8443/ce-cream/services/CREAM2] in the ICE's database at the moment. Skipping query...” be suppressed in the default setting ? It's not really a warning and I don't really need to know where my users <b>don't</b> have jobs running.
